## EDUCATION

### Java Backend Developer

MASAI SCHOOL

02/2022 – present

### Bachelor Of Engineering (Electrical Engineering)

SPPU Pune University

07/2015 – 07/2021

### Higher Secondary School

Maharashtra State Board

06/2014 – 06/2015

## TECHNICAL SKILLS

Java | SpringBoot | JavaScript | MySql | Apache Tomcat | AWS | HTML&CSS | DSA | Postman | AJAX | J2EE | JSP

## SOFT SKILLS

Time Management

Communication Skills

Adaptability

Teamwork

## INTERESTS

Reading

Team Sports Or Activities

Continuous Learning

## PROFILE

Dynamic and results-oriented Java Developer with 1 year of experience in designing, developing, and deploying robust applications using Java, Spring, Spring Boot, JSP, MySQL, and SQL. Proficient in implementing login security measures and integrating third-party APIs seamlessly. Demonstrated expertise in facilitating data exchange through HttpClient and enabling users to download Excel files efficiently.

## PROFESSIONAL EXPERIENCE

### Java Full Stack Developer

NJ Group - Finlogic technologies India Pvt . Ltd

03/2023 – 04/2024

#### Project1:- CIADESK

- Implemented a comprehensive login security system using Spring Security, ensuring secure access to sensitive data and functionalities.
- Integrated OAuth2 authentication to ensure secure user authentication and authorization, leveraging industry-standard security protocols.
- Integrated third-party APIs seamlessly using HttpClient to fetch real-time data and enhance application capabilities.
- Developed dynamic web pages using JSP for seamless user interaction and data presentation.
- Utilized MySQL database for efficient data storage, retrieval, and management.

#### Technologies Used:

Java, Spring, SpringBoot, JavaScript, MySQL, OAuth2, JavaMail API, DHTMLX Grid, HttpClient, Cron Jobs, Excel and PDF generation, Web services for WhatsApp integration.

## PROJECTS

### ONLINE FOOD DELIVERY APP

Github [🔗](#) Video [🔗](#)

Created a REST API for an Online Food Delivery Application.

This API performs all the fundamental CRUD operations of any Online Food Delivery Application with user validation at every step.

#### Features:

- Login-Logout Module, Admin Module, Customer Module, Restaurant Module, Item Module, Category Module, FoodCart Module, OrderDetails Module, Bill Module, OrderHistory Module.

#### Tech Stack:

- JAVA | Spring Framework | Spring Boot | Spring Data JPA | Hibernate | MySQL

#### Area Of Responsibility:

Built FoodCart module, OrderDetails Module, Bill Module, Order History Module, Bill Module.

This was a collaborative project built by 5 team members and delivered in 5 days.
